PROJECTS

- **Unity 3D Shopping Experience(AR and VR) -**   **PYTHON,JSON,c# script , c++/c , Unity Engine**
  I have worked on this project to build an AI Virtual Store for online **3-D** Shopping experience(**Virtual Reality**) by using c# and scripted it on the unity engine .
- **Snake game -**   **PYTHON**
  Snake Game in Console Implemented Using Python , used the turtle method in order to move the snake across the screen
- **A Calendar and a Digital clock**   **HTML,CSS,JAVA SCRIPT**
  First i used the table tag, which will be used to create the structure of the calendar. This will give an idea of how the calendar is created using HTML.
  Later on i applied some CSS property to make the design of the calendar better
  This is a google calendar replica made by using **CSS** for styling and scripted by using Java Script with **HTML**.
